

Photonic Aspects of Modern Radar

By Henry Zmuda

Artech House Publishers. Hardcover. Book Condition: New. Hardcover. 537 pages. Dimensions: 9.3in. x 6.2in. x 1.4in. This work provides engineers with the information necessary to integrate the fields of optics and electronics. Using a blend of expertise from industry, academia and government, the text shows the applications of this technology, both for future systems and in the evolution of todays radar. The areas covered include optical integrated circuits, optical control of phased array antennas, and high-speed signal processing. Intended for anyone interested in the future of radar, this text is augmented with 508 equations and 285 illustrations. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Hardcover.

Reviews

It is an awesome publication which i actually have ever read through. it had been writtern really properly and valuable. I found out this book from my i and dad recommended this pdf to discover.

-- Doyle Schmeler

This book is definitely not simple to begin on studying but quite fun to see. I actually have read and that i am sure that i will gonna read through yet again once again in the foreseeable future. It is extremely difficult to leave it before concluding, once you begin to read the book.
