RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 88 pages. OCLC Number: (OCoLC)52897824 Subject: Water resources development -- Finance -- Law and legislation -- United States. Excerpt: . . . orps of Engineers--Civil INTRODUCTION The Committee remains concerned about the level of the budget requests for the water resources programs of the U. S. Army Corps of Engineers. The budget request for fiscal year 2004 is about 450, 000, 000 less than the amount appropriated to the Corps in fiscal year 2003. The budget request is extraordinarily unbalanced. Eight projects account for 29 percent of the proposed Construction, General budget with the remainder of the projects severely underfunded. The proposed General Investigations budget, which provides funding for studies of water resources needs, is decimated. Only studies in their final year were adequately funded, the remainder were severely underfunded. The proposed Operations and Maintenance budget appears to show an increase, however, when accounting for inflation and proposed funding transfers that are unlikely to be enacted, the final total is less than the amount appropriated in fiscal year 2003. The budget proposed for the Mississippi River and Tributaries project, is equally inadequate. If the proposed budget request were enacted, the Corps would be forced to terminate on-going construction contracts costing the government some 200, 000, 000 in termination fees, demobilization costs, and delays in project schedules. As has been the practice for the last several years, the budget proposal contained no new construction starts. The budget proposal stated that this was done in order to only fund the backlog of on-going work (estimated at 23, 000, 000, 000 in the budget proposal) and that within 10 years, this backlog would be reduced to zero. Followed to conclusion, that would mean that within 10 years the Corps would only...
