## Fundamentals of Dynamics and Analysis of Motion

---

By Marcelo R. M. Crespo Da Silva

Dover Publications Inc., United States, 2016. Paperback. Book Condition: New. First Edition, First. 234 x 159 mm. Language: English . Brand New Book. Designed for a first-year graduate-level course in dynamics for students in physics and engineering, this text will also be useful for self-study and as a reference book for students working in this area. Prerequisites include previous courses in statics, calculus, and basic ordinary differential equations. The treatment stresses the fundamentals of setting up and solving dynamics problems rather than the indiscriminate use of elaborate formulas. Topics include essential material for dynamics, kinematics and dynamics of point masses, kinematic analysis of planar mechanisms, special dynamical properties in a system of point masses, and dynamics of rigid bodies in simpler planar motion. Additional subjects include an introduction to dynamics of rigid bodies in general motion, an introduction to analytical dynamics, and vibrations and oscillations of dynamical systems. The appendixes include tutorials on relevant software as well as answers to selected problems and references for advanced study.

*Complete guideline! Its this type of great read through. it absolutely was writtern quite perfectly and helpful. I am very happy to explain how this is basically the best book i actually have read through during my personal life and can be he very best book for at any time.*
